

Joint Source-Channel Decoding: A Cross-Layer Perspective with Applications in Video Broadcasting (Hardback)

Filesize: 8.52 MB

Reviews

This pdf is fantastic. It really is basic but shocks inside the 50 % in the pdf. I realized this pdf from my i and dad encouraged this pdf to discover.

(Hunter Witting)

JOINT SOURCE-CHANNEL DECODING: A CROSS-LAYER PERSPECTIVE WITH APPLICATIONS IN VIDEO BROADCASTING (HARDBACK)

To read **Joint Source-Channel Decoding: A Cross-Layer Perspective with Applications in Video Broadcasting (Hardback)** PDF, remember to follow the link under and save the document or have accessibility to additional information that are relevant to JOINT SOURCE-CHANNEL DECODING: A CROSS-LAYER PERSPECTIVE WITH APPLICATIONS IN VIDEO BROADCASTING (HARDBACK) ebook.

Elsevier Science Publishing Co Inc, United States, 2010. Hardback. Condition: New. Language: English. Brand new Book. Treats joint source and channel decoding in an integrated way Gives a clear description of the problems in the field together with the mathematical tools for their solution Contains many detailed examples useful for practical applications of the theory to video broadcasting over mobile and wireless networks Traditionally, cross-layer and joint source-channel coding were seen as incompatible with classically structured networks but recent advances in theory changed this situation. Joint source-channel decoding is now seen as a viable alternative to separate decoding of source and channel codes, if the protocol layers are taken into account. A joint source/protocol/channel approach is thus addressed in this book: all levels of the protocol stack are considered, showing how the information in each layer influences the others. This book provides the tools to show how cross-layer and joint source-channel coding and decoding are now compatible with present-day mobile and wireless networks, with a particular application to the key area of video transmission to mobiles. Typical applications are broadcasting, or point-to-point delivery of multimedia contents, which are very timely in the context of the current development of mobile services such as audio (MPEG4 AAC) or video (H263, H264) transmission using recent wireless transmission standards (DVH-H, DVB-SH, WiMAX, LTE). This cross-disciplinary book is ideal for graduate students, researchers, and more generally professionals working either in signal processing for communications or in networking applications, interested in reliable multimedia transmission. This book is also of interest to people involved in cross-layer optimization of mobile networks. Its content may provide them with other points of view on their optimization problem, enlarging the set of tools which they could use. Pierre Duhamel is director of research at CNRS/LSS and has previously held research positions at...
