Blockchain technology could be the greatest innovation since the internet. What exactly is Blockchain? Blockchain is a simple but ingenious new protocol that allows peer-to-peer internet transactions that are both secure and anonymous. Many governments and companies are already looking at how to put blockchain technology in place in a wide range of areas. This new protocol could impact every individual on the planet within the next few years. Why is this important? Blockchain provides a new secure tool for the transfer "value" utilizing the internet. This is powerful, especially if you're a craftsman who wants to make a living from your art, or you're a businessman looking for a better platform on which to build future business. Knowing how this new technology works can give you a real competitive edge in the future. Many of the world's leading financial institutions are already testing this technology for faster, more secure transactions. These institutions include Goldman Sachs, JPMorgan Chase, and Credit Suisse. The best new is that this technology is public. It is virtually tamper-proof. And, it is available to anyone ready to take advantage of it. This is the same technology that is the driving force behind Bitcoin and other digital currencies, but the potential goes way beyond this. Phillip Rawson's book, "Blockchain: The new Internet? How You Can Benefit from Blockchain Technology Beyond Bitcoin, Cryptocurrency, and Ethereum" is the ultimate guide to understanding how you can put this new technology to work for you. If you are planning on starting and running a business in the future, this is a book you need to have on your bookshelf. You will learn the following:...
